Revision History

VERSION	DATE	AUTHOR(S)	DESCRIPTION
1.0	10-28-2024	Shilpa Kaul	Added content for 'User Access'
1.0	01-15-2025	Shilpa Kaul	Added content to the 'Request a product from Appstore' section.
1.0	02-11-2025	Joseph Mannarino	Reviewed the document.
1.0	02-11-2025	Shilpa Kaul	Published the document.

Overview

Onboarding document is a critical part of a new hire's first few days. They include internal access, required trainings, setup and product request to help your team and the new employee understand legal obligations, and share important administrative details.

Audience

The audience for this document will be new team members of the Machine Learning and AIS team.

AccessNow

User access onboarding is the process of granting access to group to provide access to product or service to new users. This document will guide you on how to assign permissions and grant access to groups to users based on predefined rules and policies. The document is for new users who want to request access to the Active Directory group.

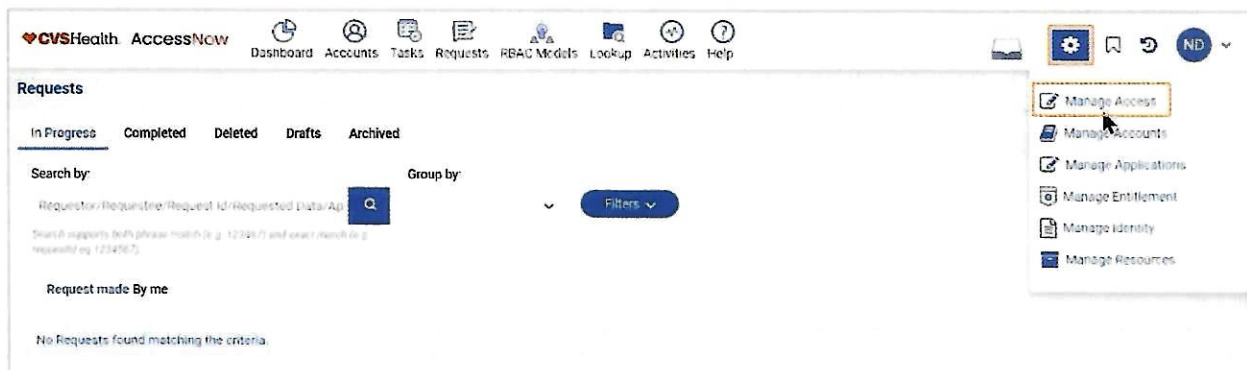

When a new employee joins our team, they require access to a few applications. They need to be added to Active Directory group.

If an account does not exist for the recipient in the domain, then an account is automatically created as part of the Add Access process and access is automatically granted to that account. If an account already exists, access is automatically granted to that account.

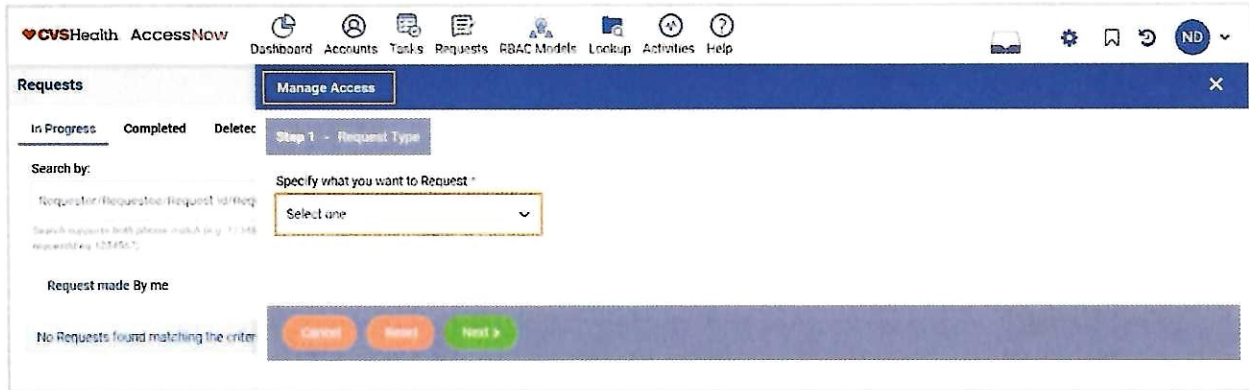

Note: The Add Access requests for non-person accounts cannot be processed by AccessNow. If you request access using a non-person identity, then the request will be rejected during fulfillment. To request access for a non-person account, send an email to the "Requests, NT Aetnaus" mailbox (REQUESTSN2@AETNA.COM)

Login to AccessNow

1. Login to **AccessNow** - <https://aetna.tuebora.com/> Reach out to Helpdesk.
2. Select the gear icon and select **Manage Access** from the dropdown.

3. The **Manage Access** page is displayed.
